## PROFILE

Dedicated and detail-oriented Medical Laboratory Technologist with expertise in conducting precise diagnostic testing and analysis. Proficient in handling advanced laboratory equipment and adhering to strict quality control protocols. Skilled in maintaining accurate records, ensuring compliance with regulatory standards, and supporting clinical teams with timely and reliable results. Passionate about advancing healthcare outcomes through meticulous laboratory practices and continuous professional growth.

## WORK EXPERIENCE

### Diagnostics Nishter

(Four Months)

- Basic Hematology involves the study of blood cells to diagnose and monitor conditions like anemia, infections, and blood disorders using tests such as complete blood counts (CBC).
- Routine Chemistry focuses on analyzing body fluids like blood and urine for substances such as glucose, electrolytes, and enzymes to assess organ function and detect metabolic imbalances.

### Garwan Orthopadic Hospital (6Month)

Receptionist / Phlebotomist

- Supervisor / Front desk manager
- Clinic Management
- Sample Analysis
- Patient Adaptability

### Waseela Lab Multan ( on going)

#### Routine Lab Investigations

- Blood glucose, lipid profiles, liver and kidney function tests, and urinalysis.
- Uses advanced instruments and robotics to streamline processes like sample handling, analysis, and reporting, improving efficiency, accuracy, and turnaround time for routine and complex tests.
